

# Sprint 2

Joseph Victor S. Sumbong

## **Sprint Goal:**

Create the home page, navigation bar, and allow users to get to individual blogs

## Product Backlog

User Story	Acceptance Criteria	Story Points	Value Points	Value for Money
<i>As an Administrator, I want to have a place where all the blogs and other site contents are stored, and future blogs can be added and edited.</i>	<i>There is a database where all the blogs and site contents are stored.</i>	13	89	6.85
<i>As an Administrator, I want users to be able to register.</i>	<i>There is a register page that saves the user's information into the database</i>	2	6	3
<i>As an administrator, I want registered users to have the ability to log in to the website.</i>	<i>There is a log in page that can authenticated the user</i>	2	6	3
<i>As a developer, I want to learn and apply bootstrap to the website</i>	<i>The developer understands how to use bootstrap for the website</i>	2	14	7
<i>As a user, I want to be able to scroll through snippets of blogs in one place</i>	<i>The home page has multiple snippets of different blogs in it.</i>	2	13	6.5
<i>As a user, I want to be able to navigate the website and its webpages</i>	<i>There is a navigation panel that users can click to go to the different webpages</i>	2	8	4
<i>As a user, I want to be able to view the different blogs</i>	<i>When clicking on the title of the blog from the home page, it will show the contents of the blog to the user</i>	2	13	6.5
<i>As a user, I want to be able to create my own blog</i>	<i>When clicking on a certain button, allow registered user to make their own blog to be posted on the website</i>	2	10	5
<i>As a user, I want to be able to edit my blogs</i>	<i>When clicking on a certain button, allow the registered user to edit the blog if it is their own.</i>	2	6	3

## Sprint Backlog

User Story	Task	Time allotted
<i>As a developer, I want to learn and apply bootstrap to the website</i>	- <i>Research on bootstrap</i>	- 4 hours
<i>As a user, I want to be able to scroll through snippets of the blogs in one place</i>	- <i>Create the home page</i>	- 1 hour
<i>As a user, I want to be able to navigate the website and its webpages</i>	- <i>There is a navigation bar that users can click to go to the different webpages</i>	- 1 hour
<i>As a user, I want to be able to view the different blogs</i>	- <i>Create an individual blog page</i> - <i>Link it to the homepage</i>	- 1 hour

## Daily Scrum

Week 1					
	Monday	Tuesday	Wednesday	Thursday	Friday
Task that was done	None	Researched bootstrap	Created the homepage and navigation bar	None	Created an individual blog page and link to the homepage
Task to be done the next working day	Research bootstrap	Create the home page	Create an individual blog page and link to the homepage	Create an individual blog page and link to the homepage	None
Impediments	Poor internet connection	None	Other school activities	None	None

**Sprint Review:**

- The Sprint goal was achieved because we successfully created the home page, navigation bar, and allow users to get to individual blogs.
- The next Sprint should focus on creating the back-end of the website and making it work with the front-end.

**Sprint Retrospective:**

Things that went well:

- Most of the task in the sprint backlog was done within the time allotted for it

Problems encountered:

- Other school activities.
- Poor internet connection

The problems were solved by:

- Finishing other school activities in a sequence based on their date of submissions.
- Waiting for a time that internet connection was good.

Things to improve:

- Better time management
