

Sprint 1

Joseph Victor S. Sumbong

Sprint Goal:

Create a Product and Sprint Backlog as well as a Sitemap
and wireframe for the website

Product Backlog

User Story	Acceptance Criteria	Story Points	Value Points	Value for Money
<i>As an Administrator, I want to apply Scrum so that the website can be done incrementally.</i>	<i>There are product backlog, sprint backlog, sprint plan, and other Scrum events and artifacts.</i>	5	55	11
<i>As an Administrator, I want a visual representation of the hierarchy and flow of the website.</i>	<i>There is a sitemap that shows the hierarchy of the website</i>	2	34	17
<i>As an Administrator, I want to have a visual representation of how the website should be seen by the user.</i>	<i>There is a wireframe that shows the desired design of the website</i>	2	34	17
<i>As an Administrator, I want to have a place where all the blogs and other site contents are stored, and future blogs can be added and edited.</i>	<i>There is a database where all the blogs and site contents are stored.</i>	13	89	6.85
<i>As an Administrator, I want users to be able to register.</i>	<i>There is a register page that saves the user's information into the database</i>	2	6	3
<i>As an administrator, I want registered users to have the ability to log in to the website.</i>	<i>There is a log in page that can authenticated the user</i>	2	6	3
<i>As a developer, I want to learn and apply bootstrap to the website</i>	<i>The developer understands how to use bootstrap for the website</i>	2	14	7
<i>As a user, I want to be able to scroll through the blogs in one place</i>	<i>The home page has multiple snippets of different blogs in it.</i>	2	13	6.5
<i>As a user, I want to be able to navigate the website and its webpages</i>	<i>There is a navigation panel that users can click to go to the different webpages</i>	2	8	4
<i>As a user, I want to be able to view the different blogs</i>	<i>When clicking on the title of the blog from the home page, it will show</i>	2	13	6.5

	<i>the contents of the blog to the user</i>			
<i>As a user, I want to be able to create my own blog</i>	<i>When clicking on a certain button, allow registered user to make their own blog to be posted on the website</i>	2	10	5
<i>As a user, I want to be able to edit my blogs</i>	<i>When clicking on a certain button, allow the registered user to edit the blog if it is their own.</i>	2	6	3

Sprint Backlog

User Story	Task	Time allotted
<i>As an Administrator, I want to apply Scrum so that the website can be done incrementally.</i>	<ul style="list-style-type: none"> - Create a product Backlog - Create a Sprint Backlog - Implement the Scrum events 	<ul style="list-style-type: none"> - 1 hour - 1 hour - Throughout the Sprint
<i>As an Administrator, I want a visual representation of the hierarchy and flow of the website.</i>	<ul style="list-style-type: none"> - Think about what the website should be - Think about the different contents for said website - Create a sitemap that shows the hierarchy, flow, and content of the website 	<ul style="list-style-type: none"> - 30 minutes - 30 minutes - 2 hours
<i>As an Administrator, I want to have a visual representation of how the website should be seen by the user.</i>	<ul style="list-style-type: none"> - Plan for the visual design of the website - Create the wireframe 	<ul style="list-style-type: none"> - 1 hour - 3 hours

Daily Scrum

Week 1					
	Monday	Tuesday	Wednesday	Thursday	Friday
Task that was done	None	Created a product and sprint backlog	Created a sitemap	Created a wireframe	None
Task to be done the next working day	Create a product and sprint backlog	Create a sitemap	Create a wireframe	None	None
Impediments	School activities	None	Poor internet connection	None	None

Sprint Review:

- The Sprint goal was achieved because the Product and Sprint Backlog was created and was also able to create a sitemap and wireframe that reflects the website to be made.
- Added the need to apply bootstrap into the Product Backlog.
- The next Sprint should focus on creating the front-end of the website.

Sprint Retrospective:

Things that went well:

- Most of the task in the sprint backlog was done within the time allotted for it

Problems encountered:

- Other school activities.
- Poor internet connection

The problems were solved by:

- Finishing other school activities in a sequence based on their date of submissions.
- Waiting for a time that internet connection was good.

Things to improve:

- Better time management
